apple MEDICAL CORPORATION

Since its introduction, thousands of Mobius Elastic Retractors have been used world-wide for a large and growing number of applications. Do you have a novel application or technique that you'd like to share with your colleagues?

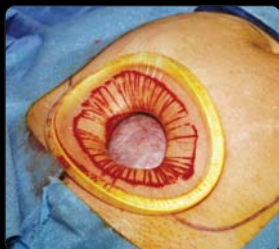

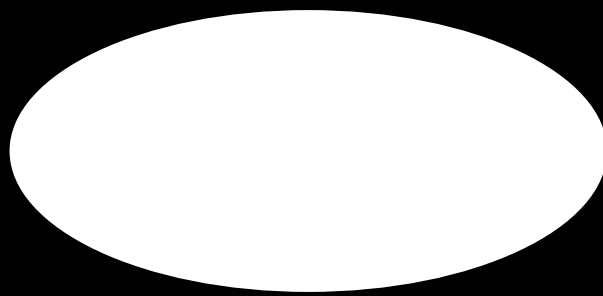

Please go to www.applemed.com "Contact Us".

**Achieve superior surgical exposure for any laparotomy....
mini to full...while minimizing incision size**

Mobius® Elastic Abdominal Retractor

- Radial retraction provides greater exposure than metal retractors...no obstructions in the surgical field.
- Lines incision and helps protect wound from contamination.
- Easy to place and remove: inserts in seconds, removes with one finger.
- Gentle to tissue, reduces patient discomfort.

Superior, gentle exposure and unobstructed surgical field.

Ease of placement and removal helps speed procedure.

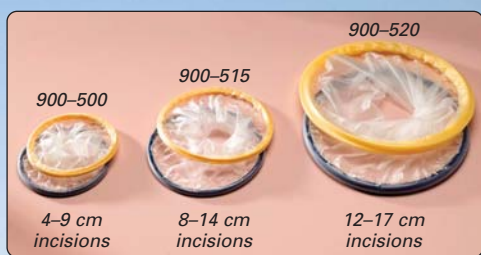

From: A Novel Minilaparotomy Approach for Large Ovarian Cysts, *OBG Management*, Feb. 2004. To review the complete article, go to www.applemed.com/mobius

Gynecologists who have tried the Mobius® Elastic Retractor are immediately sold on the benefits of this simple, effective technology.

Ask your Apple Medical Representative for a FREE Mobius evaluation and experience the benefits first-hand.

You'll never go back to metal retractors again!

apple MEDICAL CORPORATION

Unique Mobius external ring provides a natural inverting force that simplifies set-up and reduces the need for surgical assistance. When in place, the Mobius Retractor creates a less traumatic, circular, completely self-retaining area of abdominal retraction.

Now available in three sizes for every incision length from 4 cm to 17 cm. The same outstanding performance obtained with the original Mobius for minilaparotomy is **NOW AVAILABLE FOR FULL LAPAROTOMY!**
